

See the following drawings for overhead meter on house service construction details:

Drawing 7.1-1 Overhead Meter on House or Building - Wall or Fascia Attachment

Drawing 7.1-2 Overhead Meter on House or Building - Service Mast Attachment

**Notes:**

1. The Cooperative will not install lines over pools, sheds, or decks. Never build anything over or under electrical lines or facilities. Check with Cooperative for clearances.
2. Electric lines shall not pass over or near a swimming pool. Contact the Cooperative for required clearances from overhead or underground power lines.
3. Attachment point shall be approved by Cooperative; attachment height shall be minimum 13 1/2' and maximum 21'. A service mast may be required.
4. For residential service, the meter is to be located on the outside of the building on the side of the residence and outside of the fence on the side most economical to reach from the Cooperative's facilities
5. If trees, structures, or other obstructions interfere with the overhead service line, the obstruction must be removed, or the connection points may need to be relocated or the service line converted to underground (if possible) at the member's expense.

**CALL 48 HOURS BEFORE YOU DIG – Dial 811**  
It shall be the member's responsibility to stay clear of all underground facilities.
