First Electric
Cooperative

WHAT IS A CO-OP?

We're Powered by YOU!

First Electric is more than your local electric provider – we're a not-for-profit, member-owned cooperative built to serve, not profit.

We were founded when neighbors came together to bring electricity to rural areas that had been left without service by for-profit utility companies. That spirit of cooperation still drives us today.

Unlike investor-owned utilities, we don't send profits to shareholders. Instead, any money left over after operating expenses – called margins – is returned to you, our members, as capital credits.
